# IBS TF 12/15/18

”A reliable and compact tray former which handle most of the FEFCO traytypes.”

## Fast and reliable:

The machine is of a solid modular construction it erects, folds and seals die cut corrugates board blanks into trays in many different styles and sizes with hot melt. The solid frame construction, together with many years' experience of tool construction, makes the machine very stable and reliable. The magazine is positioned so it easily can be filled up during production. It is easy to handle, require a minimum of maintenance and it can easily be adapted to a new format sizes. Either to change a fix tool or by using our flexible hand wheel adjusted format tool. Right- or Left hand out feed direction is optional.

On request we have as well a Twin-head tray erector that gives twice the capacity or produces two different tray sizes at the same time. With its two magazines and tooling, that can be individually controlled, the machine becomes very flexible since two different sizes can be produced simultaneously. If you choose to run the same size in both tools you can double the capacity, compared with our standard TF.

## Ideal for:

Machine lines for bakeries, fruit and vegetables cultivation, snacks industry etc.

## Machine range, case sizes and capacities

	TF 12 max	TF 15 max	TF 18 max
Case size	800x800 mm	1100x800 mm	1400x800 mm
Capacity	15-30 cases/min depending on type and size of case.		

**Lundgren Machinery AB** manufactures machinery and other appliances primarily for the food-, chemical- and pharma-ceutical sectors. After a hundred years we can, with a good conscience, safely say that we are a reliable partner. With us you can expect cutting edge technology, short lead times, high quality, secure delivery times and not least, a reliable supplier. Find our contact information and more information about us on [www.lundgrenmachinery.se](http://www.lundgrenmachinery.se). More news and all about us via our App at AppStore and Google play for our latest development's.

## Specifications:

**Air consumption:** 600 l/min (FAL – nominal flow free air)

**Air connection:** 1/2 inch; 600 kPa.

**Electrical:** 3x400V AC + N + PE, 50 Hz, Fuse 16 Amps.

**Control:** IMC.

**Drive:** Pneumatic or servo controlled motor.

**Weight:** 400 kg
